Professional Profile

Industrial Engineer, master's in financial management. I have experience in the Fintech Industry and a broad knowledge in Frontend development in technologies such as MongoDB, Express, ReactJS, NodeJs, JavaScript, HTML and CSS. I consider myself to be a very creative and empathic person, with skills in teamwork, effective communication, strategic planning, negotiation, problem solving and time management. The above, carrying out a continuous improvement in the decision-making process and impacting highly analytical and efficient teams.
